## EXECUTIVE SUMMARY

A results-driven Data & Analytics leader with 18+ years of experience architecting enterprise data platforms, steering large-scale global delivery organizations, and institutionalizing analytics capabilities across Retail/FMCG, BFSI, Telecom, Distribution, and Manufacturing verticals. Demonstrated track record of transforming data engineering functions into high-impact, revenue-generating practices — spanning enterprise data modernization, cloud migration, AI-ready architectures, and advanced analytics.

Recognized for sharp business acumen in Data Strategy, Practice & P&L Leadership, Pre-Sales Solutioning, and Digital Transformation. Adept at engaging CXO stakeholders with compelling data narratives, building reusable delivery accelerators, and enabling DataOps-led operating models that elevate quality, speed, and scale.

## CORE LEADERSHIP COMPETENCIES

- Data & Analytics Strategy
- Enterprise Data Platform Architecture
- Data Modernization & Cloud Migration
- Data Governance, Quality & Compliance
- CXO Stakeholder Engagement
- DataOps & Scalable Engineering Practices
- Data Practice / Vertical Leadership
- Data Engineering & Lakehouse Architecture
- Pre-Sales Leadership & RFP Solutioning
- AI / ML & Advanced Analytics Enablement
- Delivery Governance & Margin Optimization
- Data Fabric & Data Mesh Architecture

## KEY EXECUTION IMPACT

- **Built and scaled enterprise data engineering capabilities** supporting large-scale analytics transformation for global clients across multiple industry verticals.
- **Designed and launched reusable delivery accelerators** — including a Data Quality Framework, Automated Data Pipeline, and Rapid Visualization Toolkit — significantly improving delivery efficiency, standardization, and reuse.
- **Led pre-sales solutioning and RFP responses** instrumental in securing and shaping high-value strategic analytics engagements.
- **Architected modern cloud-native data platforms** and lakehouse infrastructures capable of supporting enterprise-scale analytics workloads on Azure, AWS, and GCP.
- **Established enterprise data governance and data quality frameworks** improving data reliability, regulatory compliance, and audit readiness across client organizations.
- **Enabled migration from legacy data warehouses** to modern Data Fabric and Data Mesh architectures, setting the foundation for scalable, decentralized analytics ecosystems.
- **Recipient of the CEO Award (2025)** for exceptional leadership and innovation in data practice development.

## PROFESSIONAL EXPERIENCE

### Independent Digital Commerce & Technology Project

**Freelancer** | *Jul 2026 – Till Date*

*Led the end-to-end overhaul of an e-commerce platform, covering digital strategy, product catalogue, customer experience, and online sales operations. Explored AI/GenAI-enabled opportunities for product content, customer engagement, and operational efficiency.*

*Evaluated and implemented improvements across data, analytics, digital workflows, and platform capabilities to improve scalability and customer experience. Applied data-driven decision-making and technology architecture principles to streamline business processes and establish a foundation for future digital growth. Explored AI/GenAI-enabled opportunities for product content, customer engagement, and operational efficiency.*

### Director – Data Engineering & Analytics

**Innover Digital** | *Oct 2022 – Jun 2026*

*Provides strategic direction for enterprise data engineering and analytics engagements — with a sharp focus on data platform modernization, next-generation cloud data architectures, and building AI-ready analytics ecosystems that serve as lasting competitive differentiators for global clients.*

- Lead end-to-end delivery of enterprise-scale data platforms and analytics solutions, ensuring alignment with client business objectives and delivery quality standards.
- Define data strategy and architecture roadmaps that anchor digital transformation programs for clients across industry verticals.
- Drive pre-sales engagement across the full lifecycle — from solution architecture and effort estimation to proposal development — contributing to new business capture.
- Build and institutionalize reusable data engineering accelerators and frameworks that increase delivery velocity and reduce project risk.
- Architect and implement Data Fabric and Data Mesh solutions enabling scalable, decentralized data ownership and consumption models.
- Establish enterprise-grade data governance, data quality, and compliance frameworks that improve trust in enterprise data assets.
- Mentor and upskill solution architects, data engineers, and analytics specialists — strengthening the talent pipeline within the data practice.

### Technical Manager / Data Scientist

**Mindtree** | *May 2012 – Sep 2022*

*Managed enterprise data engineering, business intelligence, and analytics transformation programs for global clients in retail, financial services, and information services. Built and led cross-functional delivery teams operating at terabyte-scale data workloads.*

- Designed and delivered scalable ETL/ELT frameworks and enterprise data pipelines capable of handling large-scale, high-complexity analytics environments.
- Led cross-functional delivery teams through successful enterprise data warehouse and analytics platform implementations.
- Contributed to strategic RFP responses and proposal initiatives for clients in retail and financial services, strengthening pre-sales capabilities.
- Developed analytics optimization frameworks for complex operational challenges, including intelligent scheduling and business demand forecasting models.
- Delivered cloud analytics solutions leveraging Azure and AWS-based BI and data platforms for enterprise clients.

**Selected Client Engagements**

- **Retail E-Commerce Data Platform:** Designed a scalable data warehouse and analytics pipeline architecture delivering business intelligence and real-time operational insights.
- **FMCG Analytics Platform:** Developed an analytics roadmap and data models supporting demand forecasting, SKU performance analytics, and distribution channel insights.
- **Information Services Reporting Platform:** Built an enterprise analytics and reporting architecture integrating multiple heterogeneous operational data sources.

### Senior Executive – Business Intelligence

**Metro Cash & Carry India** | *Apr 2008 – May 2012*

*Supported enterprise data warehouse and business intelligence programs for large-scale retail operations, translating complex business requirements into analytical solutions.*

- Led the migration from fragmented local BI systems to a centralized enterprise data warehouse architecture, enabling unified reporting and analytics.

- Designed and deployed operational dashboards and executive reporting solutions using the MicroStrategy BI platform.
- Partnered with business stakeholders to translate operational reporting needs into robust analytical data models.
- Contributed to forecasting and budgeting analytics tools, improving retail decision-making and planning accuracy.

### Software Engineer

**KSTC** | *Mar 2005 – Dec 2007*

- Developed enterprise applications including inventory management systems and hospital information systems, supporting core operational data management requirements.

## EDUCATION

**Bachelor of Engineering – Industrial & Production Engineering**
Manipal Institute of Technology | Mangalore University

## PROFESSIONAL CERTIFICATIONS

- Databricks Certified Data Engineer Professional
- Microsoft Azure Fundamentals (AZ-900)
- Azure AI Fundamentals (AI-900)
- Data Science Associate (EMCDSA)
- AWS Certified Data Analytics – Specialty
- Azure Data Fundamentals (DP-900)
- GenAI & LLM on Databricks – Presales Partner Badge

## TECHNOLOGY & PLATFORM EXPERTISE

| | |
|---|---|
| **Cloud Platforms** | Microsoft Azure · Amazon Web Services (AWS) · Google Cloud Platform |
| **Data Platforms** | Databricks · Amazon Redshift · SQL Server · Teradata · Oracle · MySQL · Microsoft Fabric, Snowflake ,DBT |
| **Data Integration** | Informatica · Pentaho Kettle · Enterprise ETL/ELT Frameworks ,Fivetran |
| **Analytics & BI** | MicroStrategy · Business Objects · DOMO, Power BI, Tableau |
| **Programming** | Python · R · SQL · Shell Scripting |
| **Machine Learning** | Logistic Regression · Random Forest · Decision Trees · K-Means · Apriori |
| **Modern Architecture** | Lakehouse Architecture · Data Fabric · Data Mesh · DataOps |

## INDUSTRY EXPERIENCE

**Retail & FMCG | Banking & Financial Services | Telecom | Distribution | Manufacturing**
